

Day 7

Social Studies – Choose two explorers from the list below to research using any reference materials available to you at home. Create a Venn diagram to compare and contrast the two. Be sure you have five facts in each part of the diagram.

Explorers:

- Christopher Columbus
- Captain James Cook
- Amerigo Vespucci
- Juan Ponce de Leon
- Henry Hudson
- Hernando de Soto
- John Cabot
- Vasco Nunez de Balboa
- Hernando Cortes
- Giovanni da Verrazano
- Sir Francis Drake
- Ferdinand Magellan
- Francisco Pizarro
- Jacques Cartier

Language Arts – Choose a word from the list of multiple meaning words and write it on a piece of paper. Use a dictionary or an online dictionary to determine the word's different meanings. Then, divide your piece of paper so there is a section for each definition. In each section, write a sentence using a different word meaning and then illustrate each sentence.

Science – Remember what it means to be living or nonliving? Take a walk around your home and make a list of as many living and nonliving things that you can find. Remember the rules to consider something living or nonliving.

Math – Design a scale drawing of your secret clubhouse. A scale is a proportion between two sets of measurements. When architects draw plans for a house, they cannot draw the plans the same size as the real house, because the plans would be too large. Therefore, they must scale the drawing to a smaller size. For example, your measurement scale would be that 2 inches= 1 foot.

As you create a scale drawing using a straightedge, be sure that your clubhouse meets the following criteria:

1. The ceilings are no higher than 10 feet.
2. The total perimeter cannot exceed 48 feet.
3. The clubhouse may be any shape.
4. Doors and windows must be at least 1 foot apart. Doors should be wide enough that furniture will fit through.
5. All walls, doors and windows must be drawn with a 90° angle, perpendicular to the floor.
6. The clubhouse should be drawn to scale and should be realistic and reasonable in size.
